ESPO CHEMICALS Co., Ltd.

<https://espo-chem.co.jp>

We have entered an era where "deodorizing measures" bring added value to companies.
ESPO CHEMICALS Co., Ltd. is **Concierge for odor control**. That is, "Flag-bearer" for deodorization measures!

Chief Exective Officer
Teruki Kobayashi

Greeting from the president

Since our company was founded in 1987, we have been involved in consulting services related to odor countermeasures for many clients. Until now, because odor countermeasures were not directly related to production activities, it was often thought that the negative image of "bad odors" would hinder corporate branding. As a result, there are many cases where budget priorities are lowered, or initiatives are only started after administrative guidance or complaints from neighbors occur.

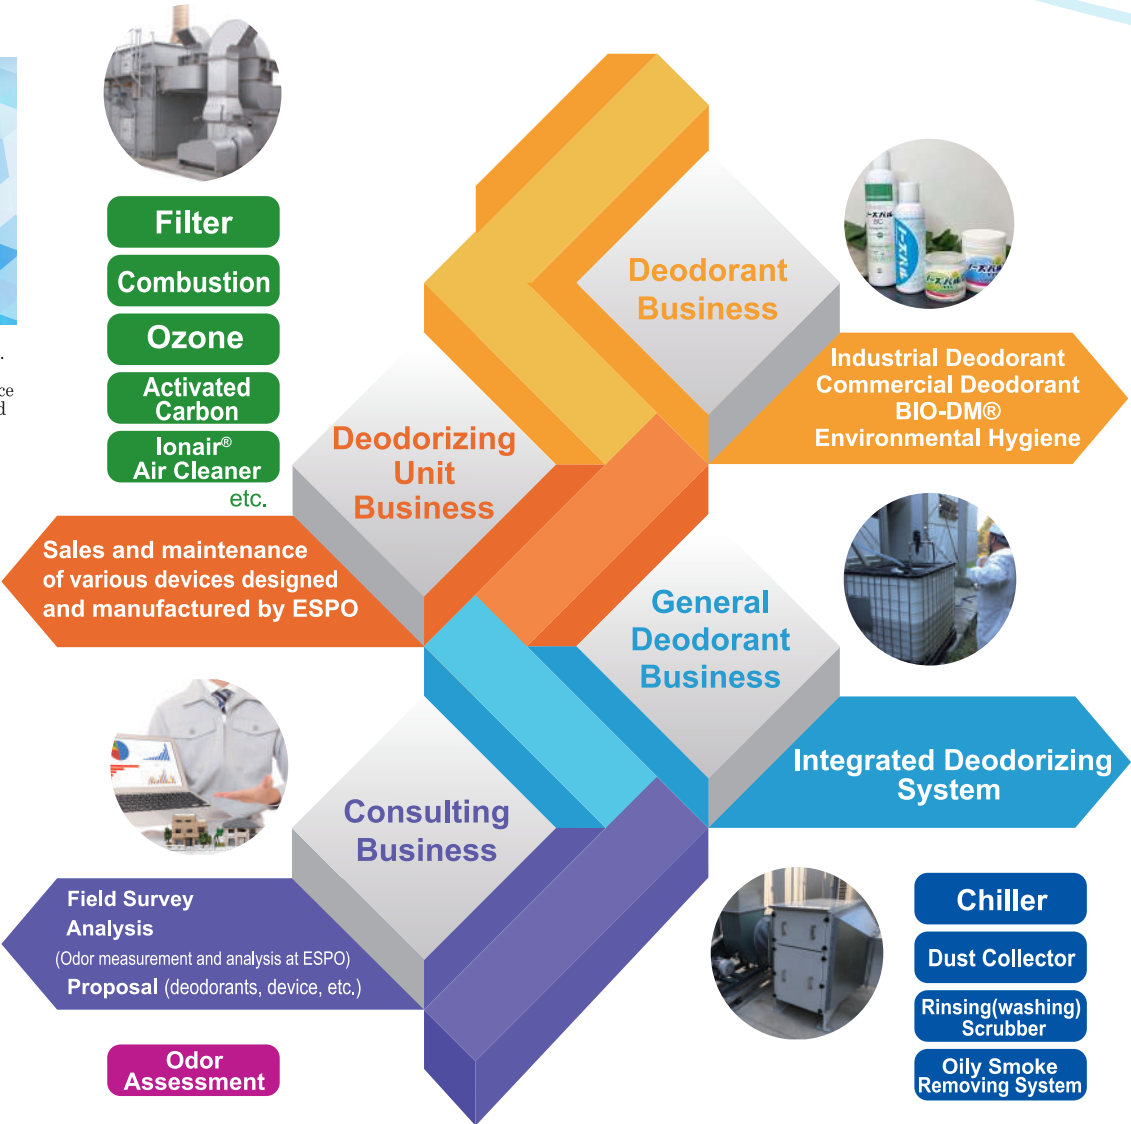

However, in September 2015, the "SDGs" were adopted at the United Nations Summit, and in October 2020, the Japanese government made the "Carbon Neutral Declaration." There is now growing interest in environmental issues around the world, and more sustainable and realistic efforts are required.

Proactive deodorization measures bring added value to companies.
The era has already arrived.

ESPO CHEMICALS Co., Ltd. is a "Concierge for odors". That is, "Flag-bearer" for deodorization measures.If you don't know where to start, our odor control professionals will be at your disposal. Please feel free to contact us with any questions you may have.

ESPO CHEMICALS Co., Ltd. will take various measures against odors in order to enhance the client's hope, security and brand image.

7 Features

Staff Interview

I want to make our company that pleases the customers with a sense of speed.

I try to make proposals that will please all our customers, not just our profits.

In the future, ESPO CHEMICALS Co., Ltd. will do its best to develop to the extent that it is recognized as a specialist in deodorization.

Sales Development Div. / Deputy General Manager
Makoto Kageyama

Consulting Service

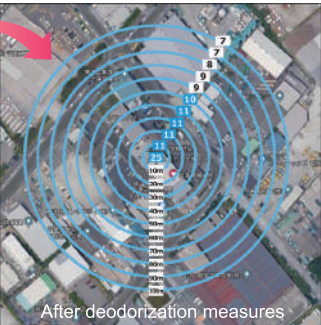

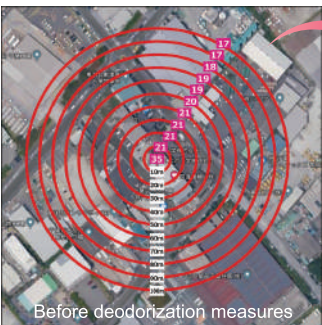

For **BAD ODOR**
Please consult with ESPO CHEMICALS Co., Ltd.

If you know the following items in advance, please let us know. We can respond smoothly. If you have any questions, our staff will explain them carefully. We also accept proposals for chemicals and equipment (for a fee).

1. Industry, process where exhaust gas is generated (source)
2. Air volume of exhaust gas (m³/min)
3. Temperature (°C) and humidity (%) of exhaust gas
4. Odor concentration (odor index)
5. Odor component (Substance Name/ppm)
6. Wastewater treatment facility (Presence or absence of processing equipment)

Visualize invisible "bad odors" and present clear research results.

By simulating the diffusion of bad odors before taking deodorization measures, we will conduct a survey that will satisfy the client. By visualizing the invisible "odor", it is possible to confirm the deodorizing effect and provide persuasive data in explanations to neighboring residents and company employees.

A common case of 90% reduction in bad odor
